**What is EKOenergy?**

- Initiative of nature conservation NGOs
- Nonprofit ecolabel
- Only 100% renewable
- Electricity, gas, heat and cold
- Tool for communication
- Available globally

**Four reasons to use the EKOenergy ecolabel**

- **Climate and nature**
  - EKOenergy's sustainability criteria guarantees minimal impact on the local environment.

- **Communication**
  - EKOenergy users can use the logo in their communications, marketing materials, products and facilities.

- **Leadership and additionality**
  - CDP, RE100 and the GHG Protocol list EKOenergy among the tools to help companies achieve more.

- **International recognition**
  - The EKOenergy criteria is international. The ecolabel is available in 40+ countries and expanding every year.

**Our contribution to the UN's Global Goals exceeded 1,400,000 € between 2015-2020**

![Map showing projects in different countries](image)

- Coffee farmers in Nicaragua
- Health clinics in Guinea
- Refugee camps in Myanmar

**Achieve more with your renewable energy purchase**

- EKOenergy-labelled renewable energy helps realise life-changing clean energy projects in developing countries.
- It fulfils the requirements of CSR initiatives and carbon reporting standards.
- Each EKOenergy user helps expand EKOenergy’s promotion of eco-friendly renewable energy in a growing number of countries.
- For each MWh of EKOenergy sales, 0.10 € (0.20 € for hydropower) is used to address the UN's Sustainable Development Goals and create additionality.

Thanks to EKOenergy users, **45+ clean energy projects** and **23+ river restoration projects** have been financed.
