

## LEVEL UP YOUR ENERGY!

The gaming sector can be the main character in the fight against climate change.

Why not power the video game sector with renewable energy? EKOenergy can help you identify and choose biodiversity-friendly renewable energy.

For a 100% renewable world

EKOenergy is a **non-profit** ecolabel for renewable energy and goes beyond that. The award winning ecolabel is available worldwide & recognised by international standards.

EKOenergy offers a **bonus package** to fight climate change, with the **best finishing moves**:

**sustainability criteria** to protect nature

**extra positive impact** via promoting the use of renewables

tangible results through financing **new clean energy projects**

fighting energy poverty and addressing **the UN's SDGs**

extra visibility via the use of **our logo**

## LET'S FIGHT THE FOSSIL FUEL BOSSES!

EKOenergy users can use our logo on products and facilities to **inform and inspire others**.

You can become a **climate hero** and accelerate the energy transition by choosing EKOenergy too!
