

# LEVEL UP YOUR ENERGY

MULTI-BILLION DOLLAR GAMING INDUSTRY CAN PLAY ITS ROLE IN THE ENERGY TRANSITION

US GAMING PLATFORMS USE 34 TWH OF ELECTRICITY ANNUALLY - AS MUCH AS DENMARK

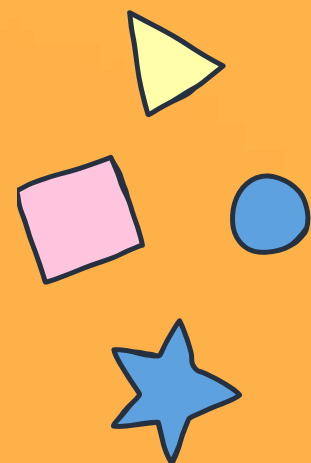

Become a hero of this global game, in which your only adversary is climate change. Your only aim is leading the energy transition to a 100% renewable world. What action do you take?

GO RENEWABLE

Development studios, publishers, gamers join forces with EKOenergy to fight fossil fuel bosses by accelerating the use of **RENEWABLE ENERGY** in the gaming world.

The EKOenergy ecolabel is on your side with an extra-bonus package: **SUSTAINABILITY CRITERIA** and **ADDITIONAL POSITIVE IMPACT** via clean energy projects in developing countries to fight energy poverty.
