

Before approving our first criteria in 2013, we consulted over 400 people, from over 30 countries: representatives of NGOs, energy companies and consumers.

We report about all of our ongoing processes through our social media and in our newsletters.

10 YEARS OF...

transparent decision-making

- Involvement and transparency are fundamental principles of EKOenergy's work.
- For our decision processes, we follow the rules of the ISEAL Standard-Setting Code, which stresses the importance of consultation with all relevant stakeholders.
- We involve a jury of experts to select the projects that get funding from our Climate Fund and Environmental Fund.
- EKOenergy's steering group operates under the control of the Board of the Finnish Association for Nature Conservation.

We strive to fully comply with with *ISO 14024 - Environmental labels and declarations – Type I environmental labelling – Principles and procedures.*

We organise an annual selection process for renewable energy projects in developing countries.

In 2015 we made the decision to expand our activities beyond Europe.

We added criteria for renewable gas in 2017, and for renewable heat in 2020.

Our International Advisory Group currently has 29 members from 4 continents.

In 2020 we reviewed our criteria for hydro-power, and in 2021 we updated the criteria with regard to bioenergy.
