

Much of our work consists of promoting sustainable production and consumption.

EKOenergy's commitment to promote renewable energy is recognised as an Energy Compact under the UN Energy programme.

10 YEARS OF... realising the SDGs

- Our label is a tool to contribute to the implementation of multiple UN Sustainable Development Goals (SDGs).
- There are many direct links between our activities and the SDGs, in particular SDG 7 (Clean and affordable energy), SDG 13 (Climate Action) and SDG 15 (Life on land).
- The projects we finance via our Climate Fund also have many links with SDGs such as SDG 1 (End poverty), SDG 2 (Zero Hunger), and SDG 3 (Good Health and Well-Being).

EKOenergy's criteria take biodiversity into account. Our ecolabel enables us to raise issues regarding nature protection in our interactions with buyers and energy companies.

Out of the 79 Climate Fund projects that we financed, 14 contribute to SDG 1, 13 to SDG 2 and 49 to SDG 3.

The UN Department for Economic and Social Affairs highlighted EKOenergy's work in their publication about good examples of SDG implementation in 2020.

All our activities relate to climate action. We promote climate-friendly energy, cooperate with other members of Climate Action Network Europe, and join in demonstrations.

FIRST EDITION

SDG Good Practices

A compilation of success stories and lessons learned in SDG implementation

16 of the projects that we financed had a direct positive impact on gender equality.

By functioning as a bridge between NGOs, energy companies and consumers, we build partnerships for the goals.
