

We moderated workshops on the sourcing of green power at the Green-Build Conference in 2018 and 2019

We talked about Scope 2 Accounting (Greenhouse Gas Protocol) at the 'Spring meetings' of CDP in 2017.

We presented at the Bischoff und Ditze Energy Conference in 2016 and 2018.

10 YEARS OF... conferences and events

- Most of EKOenergy's work happens from our office in Helsinki, or from the offices of our partners and authorised sellers. But from time to time we participate in select events, where we can meet a lot of relevant stakeholders.
- To increase our impact, we regularly participate as a supporting organisation or as a speaker.
- We often participate in events virtually too, which helps us avoid emissions from travelling.

We are always eager to participate in webinars organised by EKOenergy's authorised sellers.

We presented our work at the German Guarantee of Origin Days in 2018.

We spoke at tens of events in Helsinki, where our office is located, e.g. on workshops organised by Finnish Business & Society in 2013 and 2016.

We have participated in all editions of the REC Market Meeting, have been a speaker almost every year, and have been a supporting association since 2018.

We gave a presentation at the RE-Users Summit 2020 in Tokyo.

We have been one of the supporting organisations of the annual RE-Source Conference (Amsterdam) since 2018.

We spoke at the International Renewable Energy Conference, in Seoul, in 2019.

We were involved in various editions of the Corporate Energy Series, in 2018 and 2019.
