

We frequently sign and share petitions and letters of other organisations, such as BankTrack, 350.org, Fossil Free Japan, and many others.

We are an active member of Climate Action Network Europe and we joined their renewables campaign in 2021.

We regularly coordinate CSR organisations such as CDP, RE100, and Clean Energy Buyers Alliance.

10 YEARS OF... productive cooperation

- In the fight against climate change and biodiversity loss, cooperation is crucial.
- EKOenergy focuses on activities that are not already (or insufficiently) covered by others: 100% renewable energy, involvement of companies, the relation between energy production and biodiversity, and international solidarity.
- At the same time, we do all we can to support like-minded organisations and groups to do what they are best at.
- This way we can learn from each other, and do more

We cooperate with the Siemenpuu Foundation to select high-impact projects in Mali, Myanmar and Nepal.

For aspects related to energy tracking, we have been working with RECS Energy Certificate Association since our launch.

More than 30 environmental organisations cooperated to launch EKOenergy in 2013.

In 2015, we joined the Global 100% Renewable Energy Network and IRENA's Coalition for Action.

We have worked with other ecolabels such as LEED, Green Key and Ecocompass.
