

Since our launch, our website has been available in +20 language versions.

In the months after our first criteria were approved in 2013, we worked on making the text available in 15 languages.

10 YEARS OF... multilingual outreach

- We communicate in many different languages so that we can reach as many people and companies as possible.
- We help share information about renewable energy across language borders, with a focus on the sourcing of renewable energy and the creation of additional impact.
- For our translations, we get help from dedicated volunteers and trainees from many countries.

In 2015 we made a summary of the Greenhouse Gas Protocol Scope 2 Guidance, and translated it into 19 languages.

We made a course about renewable power for the education platform of the US Green Building Council and made it available in 4 languages.

Our Secretariat serves consumers and authorised sellers daily in over 10 languages.

EKO Sofia

UNA INTRODUCCIÓ A L'ENERGIA VERDA

In 2014, we translated our 36-page comic "EKO-Sofia" into 30 languages.

There have been 26 different native languages among the volunteers and trainees we have welcomed to our office.

More than 200 volunteers and trainees have helped us translate and proofread texts.
