

**EKOenergy**

**international ecolabel for energy**

**Now also for Gas**

EKOenergy is an international **non profit ecolabel** for renewable energy. Its goal is to help consumers find the most sustainable types of energy and communicate about it. It is the initiative of the EKOenergy Network, a group of 45 environmental organisations from 35 countries.

**Since 2017, EKOenergy certifies gas too**

EKOenergy certified gas is made from sustainable types of bioenergy or through the gasification of renewable electricity. It does not jeopardize food security or social justice

Suppliers of EKOenergy certified gas pay at least 0,10 €/MWh into EKOenergy's Climate Fund. That money is used to finance renewable energy projects all over the world

EKOenergy sets extra rules for consumer information and to avoid double counting.

Consumers of EKOenergy can freely use EKOenergy logo in their communication

Are you a seller or a consumer and interested in launching EKOenergy certified gas in your country?
